

Eng : Abdulla Wageed Ali Abdulla

A Computer Engineer, Programmer, and Data Analyst with comprehensive experience in database management using SQL Server, designing and developing Windows applications using Visual Studio, and web development and programming using ASP.NET, C#, HTML, CSS, JavaScript, and modern technologies. I possess exceptional skills in dynamic project analysis and management, as well as delivering comprehensive reports. Additionally, I have expertise in human resources and financial management, project and organization management, and banking transactions. My key strengths lie in providing innovative solutions that integrate technology, management, and creativity to ensure efficient and highly professional project execution.

Education

- **Bachelor's Degree in Computer Engineering and Science**
University of Aden – Faculty of Engineering (2019–2024)

Graduation Project

BOOK HOUSE – A web platform designed and developed using ASP.NET, C#, SQL Server, HTML, CSS, JavaScript, and Bootstrap. It is an electronic library platform that provides users with access to a vast collection of books, allowing them to explore and search for books based on various categories such as language, publisher, author, publication date, and genre. The platform enables users to download free books and purchase paid ones through a secure shopping cart and payment system, ensuring a reliable experience with simple and user-friendly interfaces.
